Note:

1 = A local control state so each district has its own accountability system and does not have a state-wide accountability system.

2 = District curriculums and assessments are developed at the local level. BMI is collected through the department of health.

3 = These states only responded to an email, not a survey. Thus, results are only from the document analyses (SHAPE America, 2016).

4 = This state participated in only part of the survey and declined further participation.
